A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Gossiau, U.S. 1,972,441.

Regarding claim 5, Gossiau discloses in figures 1-3 a engine generator arrangement (fig 1). Gossiau discloses the electric generator having a drive shaft (pg. 1, lines 26-32) and a generator casing (2,6). Gossiau discloses the output shaft of the internal combustion engine is connected to the drive shaft of the electric generator by way of an elastic coupling (pg. 1, lines 17-25). Gossiau discloses the engine casing (3,5) is connected to the generator casing (2,6) by way of at least one elastic intermediate member (7) so that a direct contact between the engine casing and the generator is avoided.

As to claim 6, Gossiau discloses the elastic intermediate member is rubber elastic elastomer layer (pg. 1, lines 64-73).

As to claim 7, Gossiau discloses the engine casing (3,5) having a first flange (5) and the generator casing (2,6) having a second flange (6). Gossiau discloses the first
